Washington, D. C.

February 1928.

We exercise the greatest care to keep true to name and hold ourselves in readiness at all times to replace, on proper proof, all stock that may prove otherwise or refund the amount paid, but it is mutually agreed between the purchaser and ourselves that we shall not be liable for any amount greater than the original price.

Dear Friend:-

This letter is being sent to those to whom we mailed our Descriptive Catalogue and is to call your attention to the fact that spring shipments will soon begin to go out from our shipping rooms.

Last Summer when the Evergreens were showing their color, the Flowering Shrubs and Roses were in bloom and the Shade Trees were making a cool and inviting lawn, did you not decide to do a little more planting this season? You know that plants must be set out while dormant and with the hot weather of Spring it will be too late to plant. Do it now, any day when the ground is not frozen, and then watch the new growth start with the coming of Spring.

Why not look through our Catalogue and tell us what you want and when you want shipment made. It is an easy matter and you will be surprised how much that Shrubs, Evergreens, Trees, Roses, Vines, etc. will add to your property both in looks and money value.

On page 13 of the Descriptive Catalogue is a "surprise collection" and is worth more than the \$4.50 that we sell them for, but we want you to get acquainted with the stock. We are prepared to make shipment of these collections now. Send us a check for this amount and tell us to make shipment. We want you to notice the root system and the well developed plants when they arrive.

Send us your order for any stock that we list. If you did not receive the Catalogue we mailed, write for another copy. Plants grown on our estate and with the coming of Spring they will bloom and beautify your home grounds.

Sincerely yours,

F. C. BOYD NURSERY COMPANY INC

Forsythia.

Buddleia.

Outdoor Beauty for Your Home

Everyone enjoys flowers for the garden. Here is an opportunity to buy in collection, or your own selection of the most popular flowering shrubs. We have selected these varieties as the leaders and most attractive in our general catalog that you will soon receive. You who are acquainted with us will at once recognize these as splendid values and real bargains. Those of you who are not acquainted with us will find this listing a real get-together, get-acquainted offer.

SPECIAL COLLECTION NO. 1

Selected from varieties on this folder. An attractive and inexpensive planting. 2 Altheas, 2 Bush Honeysuckles, 4 Forsythias, and 2 Hydrangeas. Descriptions will be found on this page.

\$2.50

SPECIAL COLLECTION NO. 2

4 Abelias, 2 Deutzias, 3 Spirea Anthony Waterer, 2 Altheas, and 2 Flowering Almonds. Descriptions of these subjects will be found on this page.

\$6.95

Althea (Rose of Sharon). Grows to a height of 8 to 12 feet. Makes excellent single specimens, or for screens. Blooms from middle July to late September. Mixed colors. 18 to 24 in., 15c each.

Abelia or Bush Arbutus. Flowers are very similar to Trailing Arbutus even having the same sweet odor; one of the best shrubs for the South. 18 to 24 in., 60c each.

Deutzia (Pride of Rochester). The white flowers tinged with pink are borne at the end of long branches in clusters of a dozen or more. Grows 8 to 10 feet. 18 to 24 in., 30c each.

Exochorda (Pearl Bush). Beautiful oriental shrub growing 6 to 8 feet tall with large star-shaped white flowers in May. Attractive foliage throughout the season. 18 to 24 in., 40c each.

Forsythia (Yellow Golden Bell). The first to bloom in the Spring. The bright yellow flowers are in full bloom even before the leaves appear. They attain the height of 8 to 10 feet. 18 to 24 in., 30c each.

Hydrangea (Paniculata Grandiflora). Great clusters of white flowers, which turn pink late in the Summer. Very showy and extra hardy. The flowers may be kept in the house all Winter. Excellent as a hedge. 18 to 24 in., 40c each.

Vitex (Lavender Tree). Flowers and foliage noted for their distinctive lavender fragrance. Flowers from May until July. Most interesting shrub. 18 to 24 in., 25c each.

Buddleia (Butterfly Bush). The delicate blue flowers are carried on long slender stems. Dies down to the ground in Winter and comes up each Spring reaching a height of 5 to 6 feet by July. Very hardy and will grow anywhere and blooms freely. 18 to 24 in., 35c each.

Spirea Van Houttei.

Philadelphus or Mock Orange. Charming white flowers with delicate sweet scent. If you can have but one white flowering shrub, let it be Mock Orange. 18 to 24 in., 35c each.

Spirea Anthony Waterer. Low growing bushy plant that bears heads of bright crimson flowers all during the Summer. This variety rarely exceeds 3 feet in height and is valuable for planting in front of taller shrubs. 18 to 24 in., 75c each.

Spirea Van Houttei. Without a doubt the finest of all Spireas. Blooms early in the Spring. Plant throws out long branches that curve and droop to the ground weighted with a mass of pure white flowers that suggest a fountain of pure white snow. May be planted as specimens or in masses. 18 to 24 in., 25c each.

Euonymus (Strawberry Bush). Long slender quadrangular branches and bright green leaves. The pink fruits are concealed in scarlet pods. A real novelty. 18 to 24 in., 15c each.

Flowering Almond (Prunus Persica). Small shrub whose upright branches are covered their entire length, in early Spring before the leaves appear, with blooms like small roses. Very attractive. 2 to 3 ft., \$1.10 each.

Symphoricarpos Racemosus (Snowberry). A medium sized shrub having beautiful deep green foliage during the Summer months. Late in the Fall it bears small white berries which hang on until snow flies. Valuable for Fall landscape effect. 18 to 24 in., 30c each.

Spirea Anthony Waterer.

Weigela Rosea. Flowers in June. A mass of soft pink blossoms. The delicacy of this beautiful flowering shrub will more than please you. Grows 6 to 8 feet high. 18 to 24 in., 25c each.

Lonicera or Bush Honeysuckle. This upright shrub grows 6 feet high. Flowers are white and in the Winter bright red berries add color to the duller garden. Plant this shrub for both Summer and Winter effect. 18 to 24 in., 25c each.

De luxe Collection

One each of flowering shrubs listed above in 18 to 24 in. size. Here is a chance for real variety for your garden.

\$5.60

Prunus.

Hydrangea P. G.

Abelia.

PAUL'S SCARLET CLIMBER

THIS is the most intensely red of all Climbing Roses, with flowers of vivid scarlet which do not fade in the hot sun. The individual flowers are much larger than those of the old-fashioned ramblers and are produced profusely and continuously for almost four weeks in June and July.

The plant is very vigorous but does not grow so tall as to become unmanageable. It may be trained to a porch pillar, on a trellis, or kept tied to a post 6 to 10 feet high, which it will clothe with a flaming mantle of flowers every year, attracting the attention of everybody by its superlative brilliance and beauty.

Paul's Scarlet Climber is rated by the American Rose Society as one of the finest climbers in the United States.

BARBERRY—The Hedge Everlasting

“What’s the best plant for a hedge in the South?”—we have been asked this question many times. Often we want to know something about the soil and where the hedge is to be planted. But about seven times out of ten we can answer right quick “*Japanese Barberry*”—and be sure the answer is right, too.

Japanese Barberry Makes the Most Beautiful Hedge

From Christmas to Christmas—every day in the year—Barberry is beautiful. In early Spring the new leaves are a soft shade of green; then as Summer comes they turn to deep glossy green; later on they assume shades of crimson, and brown and bronze-green, and keep these colors until the old leaves are pushed off the next Spring. To give still more color, the long branches carry a multitude of scarlet berries, which will give food to the birds during the cold weather.

Japanese Barberry Makes the Best Hedge

In almost every place, Japanese Barberry makes the best hedge you can have. The plants spread out, with long, drooping branches that cross up and down and sideways into a compact mass. These branches are covered with short, stiff spines, like little needles. The growth of the plants, with these spines, makes a barrier that will keep out dogs and cats, and a husky boy isn’t likely to jump through or over the hedge the second time. Barberry is better than boards to bar out trespassers.

Japanese Barberry is an Economical Hedge

The first cost is the only cost. You don’t have to put on new slats, as on a board fence; you don’t have to string new wires or tighten up old ones; there’s no painting or whitewashing, with its messiness and cost. Maybe once a year you will want to clip the ends of the long branches to keep them in bounds and to make the plants send out more branches—thus giving a still tighter and better hedge.

Where to Use Japanese Barberry

Barberry can be used in many places. **First**, as a boundary hedge between your grounds and your neighbor’s. **Second**, along the street line, or on both sides of the walk from the street to the house, and around the foundation to hide the walls or pillars—fine here, for it never gets high enough to darken the windows. **Third**, use Barberry in large groups at the lot corners, or at curves in the drive.

How Much Barberry Will You Need

For a single-row hedge, set the plants a foot apart—a hundred feet of hedge needs a hundred plants. For a double hedge, “stagger” the plants, 9 inches between the rows, and 15 inches between plants—a hundred feet of hedge needs about 160 plants. Around the house set at least two rows, in “staggered” fashion, about 15 inches apart each way. Groups at the lot corners and along driveways can be figured in the same way.

Japanese Barberry Plants Are Low-Priced

Here’s good news. We grow Japanese Barberry in enormous quantities—fields of it. So much that we can’t count all the plants—we count the plants in one row, then the rows, and estimate the total quantity. Usually the estimate is too low, and we have more plants than we thought—so you get the benefit, and here is the price—

	Each	Per 10	Per 100
12 to 18 inches.....	\$0.25	\$2.00	\$12.50
18 to 24 inches.....	.40	3.50	20.00
24 to 30 inches.....	.60	5.00	40.00

Privet Hedges are Valuable in Certain Places

Varieties of Privet can be used in much the same way as Barberry, but Privet must be pruned regularly to get the best appearance. We grow four varieties.

Amur River North	Each	10	100
12 to 18 inches.....	\$0.10	\$0.80	\$6.00
18 to 24 inches, branched.....	.12	1.00	8.00
2 to 3 feet, branched.....	.15	1.25	10.00
Amur River South			
18 to 24 inches, 1-yr., seedlings.....	.08	.50	4.00
18 to 24 inches, 2-yr., branched.....	.10	.80	6.00
2 to 3 feet, 2-yr., branched.....	.12	1.00	7.50
3 to 4 feet, 2-yr., branched heavy.....	.15	1.25	10.00

California	Each	10	100
12 to 18 inches, branched.....	\$0.05	\$0.40	\$3.00
18 to 24 inches, branched.....	.08	.60	5.00
2 to 3 feet, branched.....	.10	.80	7.00
3 to 4 feet, branched.....	.15	1.25	10.00
Ybota			
12 to 18 inches.....	.10	.80	6.00
18 to 24 inches, branched.....	.12	1.00	8.00
2 to 3 feet, branched.....	.15	1.25	10.00
